#95-2

Dear Mr. Tarpley:

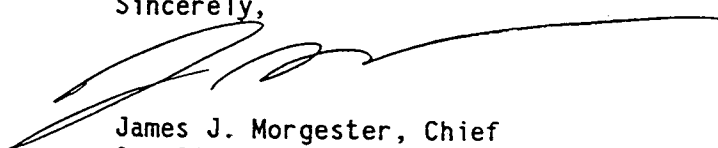

Certification of Schlumberger 2000 & 4000 Series Dispensers

You requested California Air Resources Board (CARB) certification of the Schlumberger 2000 and 4000 series dispensers, equipped with balanced vapor recovery. The Schlumberger 2000 and 4000 series dispensers were previously CARB certified as the Southwest Energy Control Systems (Southwest Pump Company) 2000 and 4000 series dispensers. According to your January 10 letter, in April of 1992 Schlumberger acquired Southwest Energy Control Systems (Southwest Pump) and continued manufacturing the 2000 and 4000 series dispensers under the Schlumberger name.

As required by the Air Resources Board certification procedures, you requested the approval of the Division of Occupational Safety and Health, the Office of the State Fire Marshal and the Department of Food and Agriculture, Division of Measurement Standards. The necessary approvals have been obtained from these agencies.

Based on the fact that the Schlumberger 2000 and 4000 series dispensers are the same dispensers certified as the Southwest Energy Control Systems (Southwest Pump Company) 2000 and 4000 series dispensers, I find that the use of the Schlumberger 2000 and 4000 series dispensers will not adversely affect vapor recovery systems on which they may be installed. Therefore the Schlumberger 2000 and 4000 series dispensers are certified for use with Phase II gasoline vapor recovery systems. If you have any questions, please feel free to call Christine McKenzie at (916) 324-7658 or Laura Sullivan McKinney at (916) 327-1525.

Sincerely,

James J. Morgester, Chief
Compliance Division
